FIRST ANNOUNCEMENT AND CALL FOR PAPER

Biomedical Engineering covers the application of a wide view in engineering to the field of biology and medicine, from subcellular level to the scale of hospital administration. The Hong Kong Institution of Engineers Biomedical Division is calling a 3-day conference for colleagues in the field to share the results of advances in biomedical engineering.

Submissions of original work regarding the application of any aspects of engineering to the medical field are now invited. Presentations are being solicited in areas including but not limited to the following:

- Bioinformatics
- Biological signal processing
- Biomaterials
- Biomechanics
- Biosensors & genetic engineering
- Education in biomedical engineering
- Medical electronics
- Medical imaging
- Medical instrumentation
- Nanotechnology and micro-electro-mechanical systems
- Pharmaceutical engineering
- Physiological modelling
- Rehabilitation engineering
- Standards & product approval
- Technology transfer & entrepreneurship
- Telemedicine and telehealth
- Tissue engineering

For details of submission and young engineers' paper competition, exhibition and poster session, please refer to the conference website.
