

Get started

The Invention Center creates global innovators. In common projects we aim to

- Push Industry 4.0 towards new boundaries and
- Innovate on cutting-edge technology on a global stage

We have created two packages for Industry 4.0 and product innovation to speed up our cooperation jointly with German expert partners and the HKPC.

Industry 4.0

Aim: Improve cost-efficiency and flexibility in your production and logistics using German Industry 4.0 technologies and standards.

Services:

- Step-by-step program: Assessment of current capabilities, advisory on reaching next maturity level, recognition of achieved maturity
- Training of all key personell: Management, data experts, engineering experts
- Technological implementation of Industry 4.0 projects and development of data analytics applications

Innovation

Aim: Become a global innovator with own products with new-to-market features and USPs.

Services:

- Joint coaching and training program to advance from internal innovation to becoming a world-class innovation leader
- Training of all key personell: Management, product managers, sales and marketing
- Technology selection, feasibility studies and implementation for customer-centric development of new products

Invention Center 科創中心

Your partner for innovation in Hong Kong

Who we are

Aim of the Invention Center, which counts around 40 German and international market leaders as its current members, is to create world-class innovators.

We do so by building a strong community, jointly developing groundbreaking innovations, and providing direct links to technology and market experts in the engineering innovation hub of Aachen, Germany, and our strong links to innovation and technology experts across Germany and globally.

We have supported the development of new-to-the-market products. We also have brought the latest research by our partners on how to do successful innovation to practice.

Our services for you

At the Invention Center and together with our strong partner HKPC you can join in both joint developments of new innovations and link with our German expert network for your own developments. We support you from a concept and market exploration up to prototype and technology development.

Community

Interact with our community of leading innovators and researchers to find valuable collaboration opportunities

Acceleration

Get support from the concept to the implementation phase to make your innovations faster and more successful

Knowledge

Get access to top technology, market and innovation experts and find out about relevant trends and developments ahead of time

Education

Build up the skills in your employee base to become a world-class innovator for your products, production and services

thINC.Talks

Experience a wide diversity of perspectives in the field of technology and innovation management through our Invention Center community. In reoccurring community events, you are given the opportunity to exchange with 'the real practitioners', learn about the latest trends and explore our diverse network. Our different locations of the Invention Center provide access to the world's leading experts.

Join the next thINC.Talks of the Invention Center, we will invite our global partners and experts to share their insights and thoughts on the latest developments around innovation topics in industry and science.

Become part of the Hong Kong-German community and enjoy our exclusive events to share your ideas. Explore the most important trends in a concise way – and use the platform to be a trendsetter.

We are hosting a series of events, get-togethers, and conferences to integrate the Hong Kong innovation community into our global community. To stay informed about our opportunities to interact, sign up to our mailing list.
